DN300-HiZ 30-port Digital E1 HiZ Board

799 Hits [On line purchase](#)

Synopsis :

DN300-HiZ provides complete call logging/recording capability for one E1 digital network interface in a single-slot. Enhanced DSP-based voice, DTMF, signaling, recording and various rates of voice compression features are available.

Features and Benefits

- Supports one digital trunks per board for recording up to 30 voice channels
- High-impedance interface allows undetectable call monitoring
- Supports E1 digital network interfaces and ISDN PRI protocol
- Determines call status and abstracts protocol-specific information for simple application deployment
- Provides reliable trunk signaling monitoring and DTMF signals detection
- ?Voice format fully compatible with Intel Dialogic's voice format. Provides variable voice coding at 24/32 Kb/s ADPCM(.vox), 48/64 Kb/s A-law/u-law PCM, and 48/64 Kb/s A-law/u-law/linear waves.
- Records both sides of a conversation (transaction record)
- Downloadable signal and call processing firmware allows easy feature enhancement, providing the flexibility to enhance applications as needs change
- Supply the same API as Intel Dialogic DM/V600-HiZ and reduce time to market

Application

- Call Logging System
- Multichannel Digital Recorder

Hardware System Requirements

- Pentium Processor PCI bus computer. Operating system hardware requirements vary according to the number of channels being used.

System Software support

- Windows NT4.0+SP5 and above
- Windows2000+SP1 and above
- WindowsXP
- Windows 2003 Server

Program Interface

- Visual C++, Borland C++, C++ Builder
- Delphi
